My friend and I encounter several problems and its inconvenience while trying to apply a qualification and rent a bike. We stated totally 5 problems as following, and I also give some advice about it.

When in the process of applying the member of the “Ubike”

✧ Drawbacks:

There are two bugs showed in this picture.

- The button “CLEAR” in this page will not clear the input of the password, but just close the keyboard. It is an obvious bug!
- The division of the separated word button is quite unclear, if I just touch the space near the button, I will not know what will be showed in the input.

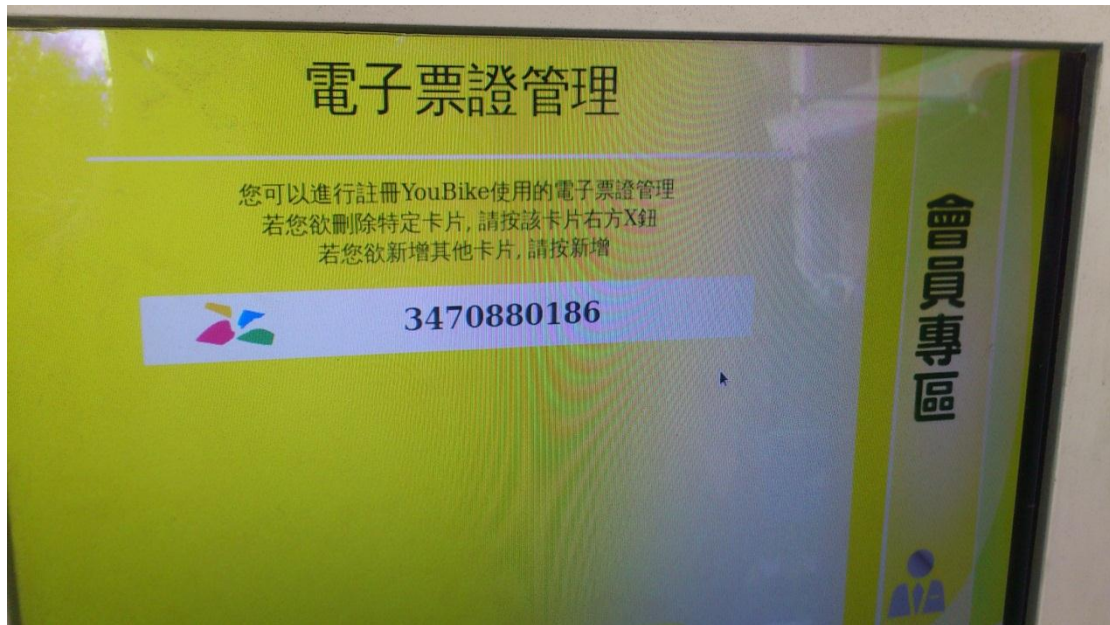

The explanation of the renting steps on 15-2 is in Chinese.

The explanation of the renting steps on 16-2 is in English.

✧ Drawbacks:

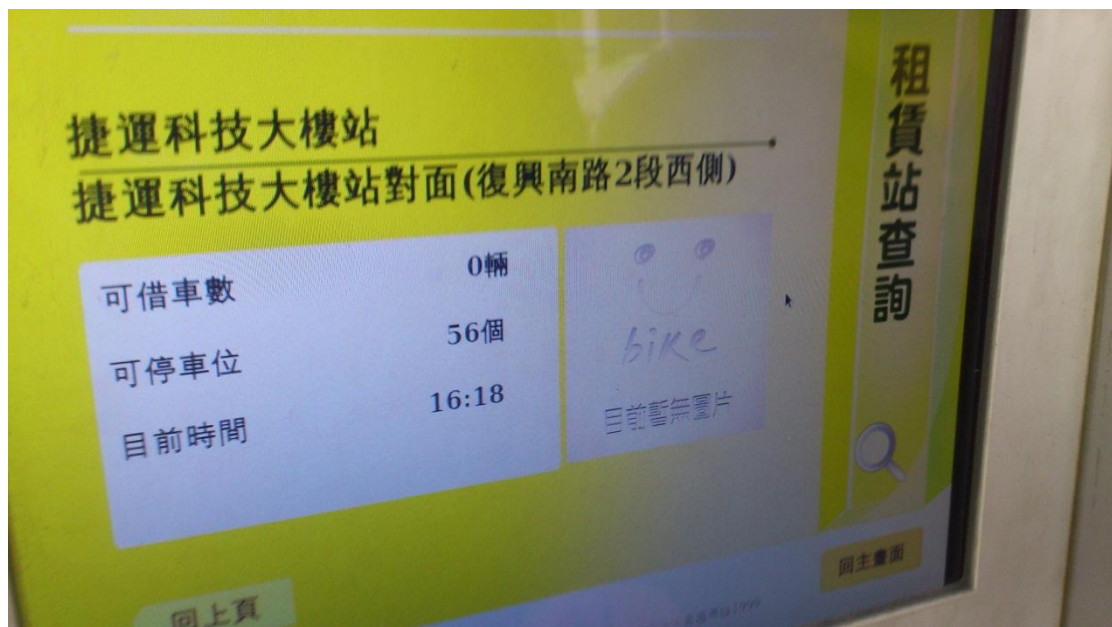

We found a quite not convenient part of the explanation of the step to borrow a bike, since the version of Chinese one and English one is separated. It may let the first-time user very confused. Maybe simplified the explanation and put them in the same part will be better.

Where is the button “X” ?!!

✧ **Drawbacks:**

It is another bug about this system. It said that I can eliminate the relationship of specific card if I just click the button “X”. However, it is quite obvious that I cannot even find a button...

I cannot see the picture !!!

✧ **Drawbacks:**

There should be a picture beside the introduction of the “Rent Station”, however, it showed nothing...
